Capital Expenditures (Capex)	84.9	50.8
Capex as a % of Sales	4.3%	3.2%

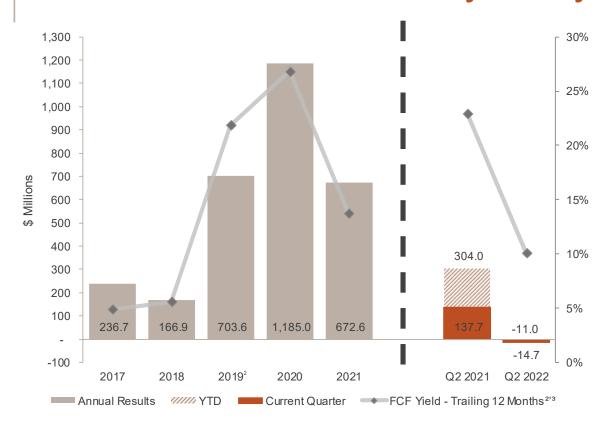

——Capex as a % of Sales

Capex

- Capex continuing to climb back to higher levels to support launching business
- We will be back in our normal spending range of 6-8% of sales in 2022 and 2023

### Cash Flow Continues to be a Key Priority

- •FCF¹ slightly negative in the quarter thanks mainly to an increase in noncash working capital
- •Liquidity<sup>1</sup> remains excellent with \$1.4 billion of cash available at quarter end

<sup>1 -</sup> Free Cash Flow and Liquidity are non-GAAP financial measures. Please refer to "Non-GAAP and Other Financial Measures" in the separately released Q2 2022 MD&A.

<sup>2 -</sup> Free Cash Flow in 2019 has been adjusted for additions of property, plant and equipment related to the dissolution of a joint venture.

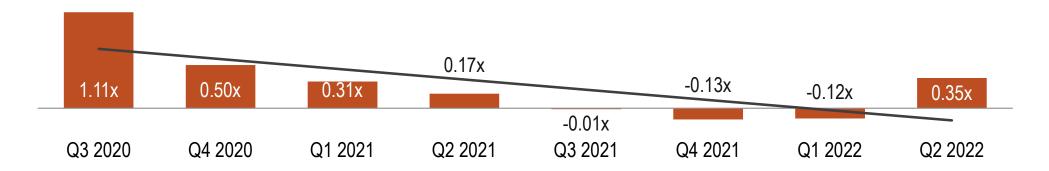

<sup>3 -</sup> Free Cash Flow Yield is a non-GAAP financial ratio and the Company believes it is useful in assessing the Company's ability to generate cash. Free Cash Flow Yield is calculated as the trailing twelve months (TTM) Free Cash Flow divided by fully diluted shares divided by share price. For Q2 2022 this calculation is TTM FCF of \$358 million (Q2 2021 - \$1,171 million) divided by fully diluted shares of 65 million (Q2 2021 - 66 million) divided by share price of \$54.54 (Q2 2021 - \$77.75).

### Leverage (in millions CAD)

	Q2 2022	Q1 2022	Q2 2021
Net Debt <sup>1</sup>	337.4	(110.3)	198.7
Net Debt to EBITDA <sup>2</sup>	0.35x	(0.12)x	0.17x

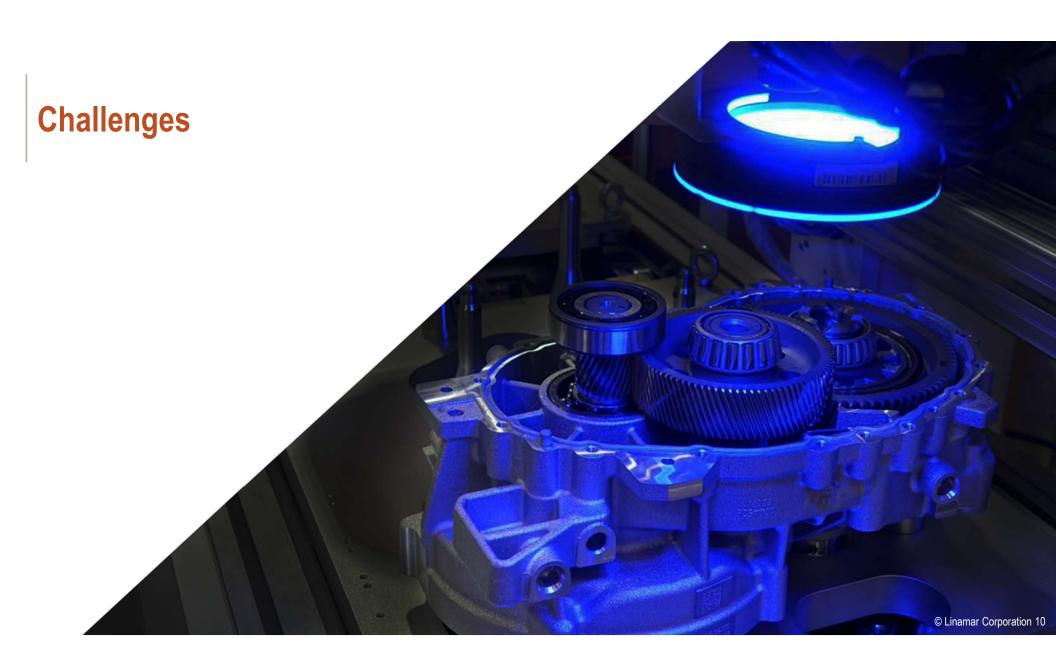

Net Debt to EBITDA

- Balance sheet is in excellent shape at 0.35x Net Debt to EBITDA despite very active NCIB and 2 acquisitions in the quarter
- 1.3 million shares purchased in the quarter under our NCIB taking us to 1.9 million YTD (before Q2 blackout started)
- Solid liquidity and balance sheet positions us well for continued acquisition opportunities as they arise

<sup>1 -</sup> Net Debt is a non-GAAP financial measure and the Company believes it is useful as an indicator of its financial position. Net Debt is calculated as Short-term Borrowings and Long-Term Debt (the most directly comparable measure as presented in the Company's Consolidated Statements of Financial Position) less Cash. For Q2 2022 this calculation is Short Term Borrowings of \$Nil (Q2 2021 - \$Nil) plus Long-Term Debt of \$1,215 million (Q2 2021 - \$930 million) less Cash of \$878 million (Q2 2021 - \$732 million).

2 - EBITDA includes trailing twelve months EBITDA on acquisitions, when applicable. 2020 Net Debt to EBITDA was restated in Q1 2021.
