

Electrified Solutions:

FlexForm Conformable Hydrogen Storage Tank

Overview

- ◆ Type 4 Hydrogen Tank
- ◆ 700 bar NWP
- ◆ Conformable tank that can be configured to fit irregular spaces within a vehicle
- ◆ Continuous manufacturing process that creates a foldable design that allows excellent packaging flexibility

Key Benefits

- ◆ Fit hydrogen tanks into already existing and common packages between propulsion types, such as:
 - ◆ Battery trays
 - ◆ In between frame rails
 - ◆ Spare tire compartment
- ◆ Designed for volume production
- ◆ More hydrogen can be stored in a given space compared to conventional storage types
- ◆ Potential to reduce the need for pre-cooling
