MEDIA RELEASE

Linamar Completes Acquisition of Aludyne North America Assets

November 14, 2025, Guelph, Ontario, Canada

Linamar Corporation (TSX:LNR) today announced that its previously announced acquisition of select Aludyne North America assets has been completed. The deal was initially announced on October 9th for Linamar Corporation to acquire a substantial portion of Aludyne North America assets for $300 million USD.

This acquisition is highly complementary to Linamar's existing Structures and Chassis business, adding advanced capabilities in aluminum casting, precision machining, and product design. Aludyne's portfolio includes knuckles, subframes, control arms, and axle housings, which aligns with Linamar's strategic focus on propulsion-agnostic structural components. Upon deal completion, these Aludyne North America facilities will be integrated into the Linamar Structures Group, part of the company's broader Mobility Segment.

Linamar has successfully executed similar integrations in the past, and this acquisition follows a proven model. Working closely with our valued customer base, Linamar has developed a long-term, sustainable business plan that ensures continuity and growth. The highly qualified and capable Aludyne teams will be a valuable addition to Linamar's global workforce.

Linamar management will immediately begin integration activities to accelerate the business optimization plan and to better support the needs of its key customers.
